

COALINGA STATE HOSPITAL SECURE TREATMENT FACILITY COALINGA, CALIFORNIA

Consolidated Engineering Laboratories (CEL) is currently providing materials testing and special inspection services on this massive 320-acre site development. This campus includes 48 one and two-story buildings that total over 1.2 million square feet. CEL also provided all off-site fabrication inspection services to seven facilities operating multiple shifts. The scope of services provided by CEL includes: reinforced concrete, post-tensioned concrete, masonry, structural steel and welding (shop and field), fireproofing and soils.

OF SPECIAL INTEREST:

- CEL mobilized a full service laboratory that was completely operational and certified by the Department of General Services to the project site within one month's notice.
- CEL had a staff with as many as 13 inspectors on site and 7 inspectors off site during the peak construction periods.
